

## Under sink Water filters manufacturer

Undersink water filters are easy to install, and packaged in attractive retail cartons, complete with installation instructions. Filter housings are rated for pressures to 100PSI and temperature to 125F. Long reach faucet, White housings and white tubing are standard. Private labeling is available with minimum order required.

### FEATURES:

1. Fully assembled for easy installation
2. Installation Instructions included
3. Long reach Faucet
3. Adapter and fittings included
3. With Steel Bracket
4. Shine spout
5. Ideal for private label marketing

- **Single Undersink Water Filter**

- 1. Single filter-two in one 10" (PPF 5um + GAC)
- 2. Pre-filter 5um remove rust, algae, small particulate etc.
- 3. Activated carbon remove bleach, chlorine, pesticide pigment etc.
- 4. Diverse water filter materials can be chosen to match the local water quality require.
- 5. Easily connects to faucet with diverter valve

- **Double Countertop water filter**

- 1. Twin water filter-10" PPF 5um + 10" GAC (or CTO)
- 2. Pre-filter 5um remove rust, algae, small particulate etc.
- 3. Activated carbon remove bleach, chlorine, pesticide pigment etc.
- 4. Diverse water filter materials can be chosen to match the local water quality require.
- 5. Easily connects to faucet with diverter valve

- **Three Stages Countertop water filter**

- 1. Triple water filter-10" PPF 5um + 10" GAC+10" CTO (or ION RESIN)
- 2. Pre-filter 5um remove rust, algae, small particulate etc.
- 3. Activated carbon remove bleach, chlorine, pesticide pigment etc.
- 4. Ion resin absorbs  $\text{CaCO}_3$  in water, reducing incrustation on pipes and prevents calculus
- 5. Diverse water filter materials can be chosen to match the local water quality require.
- 6. Easily connects to faucet with diverter valve
